

InnoBeweegLab Research & Reporting Workflow Survey

This survey aims to understand the current research and reporting workflow at InnoBeweegLab, identify bottlenecks, and determine where an AI-supported solution could provide value. The results will be used to define stakeholder needs, project requirements, and evaluation criteria for the project prototype.

Estimated completion time: 5-7 minutes

* Required

1. Full name *

2. Email *

3. Occupation *

4. What is your role at InnoBeweegLab? *

5. How often are you involved in analysing research data or creating research reports? *

- ☐ Daily
- ☐ Weekly
- ☐ Monthly
- ☐ Seasonal
- ☐ Yearly
- ☐ Never

6. Which types of research data do you normally work with? *

- ☐ Interviews / transcripts
- ☐ Resident or stakeholder feedback
- ☐ Expert assessments
- ☐ Observational data
- ☐ Quantitative measurements
- ☐ External datasets
- ☐ Existing research reports
- ☐ Other

7. Approximately how many hours does the complete analysis and reporting phase take for a typical research project? *

- ☐ Less than 5 hours
- ☐ 5-10 hours
- ☐ 11-20 hours
- ☐ 21-40 hours
- ☐ More than 40 hours
- ☐ Other

8. Approximately how much of this time is spent specifically writing, rewriting and structuring the report? *

- ☐ Less than 2 hours
- ☐ 2-5 hours
- ☐ 6-10 hours
- ☐ 11-20 hours
- ☐ More than 20 hours
- ☐ Other

9. How much time is usually spent combining information from different data sources?

Microsoft Forms type: *

- ☐ Less than 2 hours
- ☐ 2-5 hours
- ☐ 6-10 hours
- ☐ More than 20 hours
- ☐ Other

10. Which parts of the current process take the most time? *

- ☐ Cleaning / preparing data
- ☐ Quantitative analysis
- ☐ Qualitative analysis / coding
- ☐ Identifying themes and patterns
- ☐ Comparing different data sources
- ☐ Interpreting findings
- ☐ Writing findings
- ☐ Writing conclusions
- ☐ Writing recommendations
- ☐ Creating graphs / visualisations
- ☐ Formatting the report
- ☐ Reviewing and correcting the report
- ☐ Other

11. How difficult is it to combine qualitative, quantitative and expert findings into one coherent conclusion? *

Very easy

Easy

Neutral

Difficult

Very difficult

12. Which problems do you currently experience during the reporting process? ■ Data is stored in different formats ■ Data requires considerable preparation ■ Combining sources is difficult ■ Analysis takes too much time ■ Writing reports takes too much time ■ It is difficult to trace conclusions back to evidence ■ Repetitive work ■ Formatting takes too much time ■ Reports require significant rewriting ■ Maintaining consistency across reports ■ Collaboration / version management ■ Other *

- ☐ Data is stored in different formats
- ☐ Data requires considerable preparation
- ☐ Combining sources is difficult
- ☐ Analysis takes too much time
- ☐ Writing reports takes too much time
- ☐ It is difficult to trace conclusions back to evidence
- ☐ Repetitive work
- ☐ Formatting takes too much time
- ☐ Reports require significant rewriting
- ☐ Maintaining consistency across reports
- ☐ Collaboration / version management
- ☐ Other

13. Which parts of the reporting process require the most expert judgement? *

14. What makes a conclusion or recommendation high quality in your view? *

15. Which functions would be useful in an AI-supported research tool? *

- ☐ Importing and organising different data sources
- ☐ Analysing Excel / quantitative data
- ☐ Summarising interviews or qualitative responses
- ☐ Identifying themes and patterns
- ☐ Comparing findings across multiple data sources
- ☐ Generating draft findings
- ☐ Generating draft conclusions
- ☐ Generating draft recommendations
- ☐ Linking generated claims to supporting evidence
- ☐ Creating graphs and visualisations
- ☐ Generating a report following an existing template
- ☐ Supporting review and editing of generated content
- ☐ Other

16. How important is it that every AI-generated conclusion or recommendation can be traced back to its supporting evidence? *

1	2	3	4	5
---	---	---	---	---

17. How important is it that researchers can review, edit, approve or reject AI-generated content before it becomes part of a report? *

1	2	3	4	5
---	---	---	---	---

18. What concerns would you have about using AI during research analysis and reporting? *

- ☐ incorrect information
- ☐ Unsupported conclusion/ hallucinations
- ☐ Generic recommendations
- ☐ Important context being missed
- ☐ Bias
- ☐ Privacy/GDPR
- ☐ Data security
- ☐ Lack of transparency
- ☐ Over-reliance on AI
- ☐ Loss of researcher control
- ☐ I do not have significant concerns
- ☐ Other

19. What would make you trust an AI-supported research/reporting tool? *

20. What could make such a system unacceptable or unusable for you? *

21. What reduction in analysis/reporting time would make such a system worthwhile? *

- ☐ Less than 10%
- ☐ 10-25%
- ☐ 25-50%
- ☐ More than 50%

22. What would be the most important benefit of the system? *

- ☐ Saving time
- ☐ Improving report quality
- ☐ Better evidence traceability
- ☐ More consistent reports
- ☐ Faster delivery to stakeholders
- ☐ Easier analysis of large datasets
- ☐ Easier combination of multiple data sources
- ☐ Allowing researchers to spend more time on fieldwork
- ☐ Other

23. Would you be willing to participate in a short interview about the current workflow? *

- ☐ Yes
- ☐ No

24. Would you be willing to test and evaluate a prototype later in the project? *

- ☐ Yes
- ☐ No
- ☐ Maybe

25. Is there anything else about the current research/reporting workflow or your expectations for this project that would be useful for us to know? *
